EDUCATION

FAST - NUCES (National University of Computer and Emerging Sciences) Lahore, Pakistan
Bachelor of Science in Computer Science Aug. 2018 – June 2022

EXPERIENCE

Senior Software Engineer June 2024 – Present
Strategic Systems International Lahore, Pakistan

- Led and actively contributed to the development of critical new features to meet evolving client needs.
- Optimized tabbed screen navigation on a key frontend module, reducing tab-switching time from 3 seconds to under 1 second, significantly enhancing user experience.

Software Engineer June 2022 – May 2024
Strategic Systems International Lahore, Pakistan

- Architected and implemented core platform features for Intellify using .NET, Node.js and Angular, significantly enhancing functionality and user experience to meet client expectations.
- Pioneered a game-changing bulk data import feature, enabling users to upload complex datasets via Excel files, slashing data entry time by 80%.
- Improved performance by 60% with dynamic list views and caching strategies, reducing page load to under 2 sec.
- Orchestrated a comprehensive migration of the frontend from Angular 9 to Angular 15, modernizing the UI and enhancing application responsiveness by 40%

Full Stack Software Engineer October 2020 – May 2022
Boost 79 Szolnok, Hungary (Remote)

- Led and engineered mobile and web applications using React, React Native, and Node.js.
- Deployed applications for continuous integration and testing, maintaining high quality.
- Led development of a chat web app and a mobile platform for peer-to-peer parking rentals.
- Collaborated with team members and stakeholders to define project scope and deliverables.

Full Stack Web Developer (Intern) March 2021 – October 2021
Taps N Clicks Lahore, Pakistan

- Built admin dashboard for video-sharing app to manage users and content.
- Built backend services using Node.js and Firebase, and frontend components with React.
- Developed comprehensive user engagement analytics for data-driven decision making.
- Increased content moderation efficiency by 70%, cutting response time from 24 to under 4 hours.

PROJECTS

DocTalkNow | *TypeScript, Next.js, Tailwind, Langchain, MongoDB* August 2023 – June 2024

- Developed a web app enabling users to upload documents and interact with them through chat.
- Implemented features for summarizing articles and generating transcripts from audio files.
- Integrated subscription models for unlimited usage.

Home Parking | *JavaScript, Node.js, React Native, Firebase, Google Maps* August 2021 – May 2022

- Developed a cutting-edge mobile application enabling seamless parking space rentals.
- Implemented secure payment solutions via Stripe and leveraged Google Maps for dynamic navigation.

Open Stope | *TypeScript, Angular, Node.js, Python, Django, TensorFlow, MySQL* February 2021 – December 2022

- Developed an automated tool for open stope design and stability prediction using multinomial regression.
- It offers features like mining calculators, software tools, and technical guides to aid in various aspects of mining, such as ore reserve estimation, stope design, and productivity optimization.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, C, C#

Libraries/Frameworks: Nest.js, Next.js, Node.js, Angular, React, .NET, Socket.IO, Redux Toolkit, Firebase, Langchain

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools: VS Code, IntelliJ, GitHub, Git, GitLab, Visual Studio, Postman
